

PROFESSIONAL LINE

ReliaG® Pro Series

MODEL 3020

Belt or Chain Drive
Garage Door Opener

 Battery Backup Capable

Highlights

- **Durable, reliable performance** – The strong DC motor operates most properly balanced residential sectional doors up to 10' high. Model 3020 has an opening speed of 7.0" per second*.
- **Battery Backup Capable** – No more unexpectedly getting locked outside the garage when the power goes out! The battery unit can easily be added to your opener if you so choose.
- **Soft Start & Stop Control** – DC technology allows your door to begin and end its movement smoothly instead of abruptly whenever you operate it, creating less noise and less wear on the door.
- **6' power cord** – While most openers come with a 4' power cord, the Model 3020 cord is 6' in length to compensate for outlets that require longer reach.
- **Dependability** – The quality built into a Model 3020 is backed by a 15-Year motor and 15-Year belt drive rail Limited Warranties^o (5-Year chain drive rail).
- **Smart Lighting** – The Model 3020 comes with lighting on each side of the powerhead to help spread light around the entire garage.
- **GenieSense™ Monitoring** – Automatic force profiling and diagnostic technology improves safety by stopping operation when significant changes occur.

THE GENIE STORY: Genie has a rich history in developing garage door openers that feature reliability, strength, safety, security, and convenience. Since 1954, Genie has produced millions of openers that serve millions of satisfied homeowners every day of every year. Shouldn't you have one in your garage? Genie — The Brand You Trust.

* +/- 0.5" per second
^o Limited non-transferable warranty. See Programming, Operation & Maintenance Manual for details.

Features & Benefits

POWER & CONTROL

DC Motor Smart Technology – The DC motor offers quiet performance and gives the ability to integrate Soft Start & Stop control. This means the door begins and ends its travel smoothly instead of abruptly, helping to lessen noise with the added benefit of less wear and tear on your garage door.

C-Channel Rail – Strong rail design helps promote durability and safety. Also conceals the belt (or chain) for better appearance.

Belt or Chain Drive – Choose the belt drive option for quieter operation or chain drive for economical value.

SAFETY

Safe-T-Beam® Non-Contact Reversing System – When objects pass through the infrared beam, the garage door automatically stops closing and reverses open without having to make physical contact with the door.

SECURITY

Intellicode® Access Security System – Genie's superior encryption technology prevents piracy of the radio signal that operates your door by always selecting a new code from billions of combinations each time the opener is operated.

Sure-Lock™ Control – Allows you to lock out remote controls and wireless keypad at any time for increased security – also known as a vacation lock.

CONVENIENCE

Smart Illumination – One light bulb is positioned to each side of the powerhead to help light the entire garage. Light stays on for 4 minutes once opener is activated for ample time to get into house. Opener features bright lighting with (2) bulb capability. Genie branded LED light bulbs recommended. (If incandescent bulbs used, 60 watt max). See Genie LED bulb this page for additional details.

Auto Seek Dual Frequency – The internal system automatically uses either the 315 or 390 MHz frequency produced by the remote control or keypad to help ensure the opener responds regardless of potential nearby frequency interference, such as military base equipment.

Pre-Programmed Remote – Ready to use out-of-the-box with simple steps to change the programming if so desired.

HomeLink® & Car2U® Compatible – Works with current & ALL previous versions of HomeLink® or Car2U®. No additional external repeater kit or compatibility bridge needed.

6' Power Cord (model 3020H) – For high ceiling applications.

CALIFORNIA RESIDENTS – This opener has the option to add battery backup. As required by SB-969, all newly installed openers must have battery backup as of 7/1/19. To order this opener with battery backup, refer to Model 3020H-B. If needed, visit www.geniecompany.com or ask your Genie dealer for details.

† Limited non-transferable warranty. See Operation & Maintenance manual for details.

Convenience Options

Genie® Garage Door Opener LED Bulb

Common LED and CFL bulbs can emit interference to limit the range of garage door remotes. Incandescent light bulbs, which are being phased out due to energy inefficiency, can have their lives shortened by vibration associated with opener operation. The Genie LED bulb solves these and other problems to ensure the garage door opener light doesn't leave your garage in the dark!

Aladdin Connect®

Remotely monitor and control your garage door from almost anywhere with your smart device. Time-based features allow you to set door to automatically close and/or notify after a set length of time; as well as schedule a specific hour and minute to close the door and/or notify when it does. Also allows for multiple individual user accounts so you can provide virtual key access for your garage door to a friend, relative, or service person for a certain time, a range of time, or permanently.

Compatible with:

Use the Aladdin Connect app to control any combination of 20 different Genie Wi-Fi integrated garage door openers or standalone Aladdin Connect Door Control Modules.

Wireless Keypad

Easy-to-program keypad mounts outside your door to give you convenient code access to your garage, which is great when you are outside without the remote control. Back-lit keypad lets you easily see the numbers & control up to 3 openers. Uses Auto-Seek Dual Frequency (315/390 MHz).

Choose a color for the flip-up cover that best complements your home. White is standard, other colors sold separately.

Battery Backup

Add this option and if the power goes out, Genie battery backup power goes on so you don't have to manually open and close the garage door!

Illuminator™ LED Remote

Perfect for homeowners on the go, this 2-button remote features a bright LED flashlight and comes with an 18" lanyard for carrying convenience. It can operate up to two Genie garage door openers with Intellicode®.

Wireless Wall Console

An attractive wall console that's completely wireless for flexible placement in the garage. Enjoy the optional pulsing back-light as well as delay button that gives ample time (up to 30 seconds) to exit the garage before the door begins moving. The work light button can turn just the opener's light on at any time. Compatible with most Genie Intellicode® openers made since 2013.
